## **Climate action: International learnings on the governance of national and local government collaboration**

The Local Government Association recently published a report by Arups that compares the UK efforts tackling the impacts of climate change against best practice in other countries.

Councils in England are taking innovative steps to tackle climate change,

in five case study countries, to understand how they structure and govern their response to climate change. The report draws out key insights and recommendations for England.

Whilst of a general nature, the report may be of interest to WHSs, particularly those currently revising Management Plans.
